PROFESSIONAL SUMMARY

Customer Experience Operations professional with 5+ years translating business needs into scalable systems and optimizing customer-facing processes. Expert in cross-functional project management, technical troubleshooting, and workflow automation. Proven track record implementing AI-powered solutions, building documentation standards, and driving process improvements that enhance customer experience and operational efficiency.

CORE COMPETENCIES

Operations & Systems: Salesforce Service Cloud, Workflow Automation, Process Optimization, Technical Troubleshooting, System Administration

Customer Experience: Cross-Functional Project Management, Stakeholder Alignment, Documentation Standards, Process Standardization, Customer-Facing Operations

PROFESSIONAL EXPERIENCE

Thumbtack — Remote

January 2022 – December 2024

Operations Consultant | Escalations Lead

- Translated evolving business needs into actionable workflows, reducing escalation response times by 95% through systematic process improvements and automation
- Served as first line of defense for GTM systems support, independently troubleshooting and resolving complex technical issues across Trust & Safety, Legal, and Operations teams
- Built and maintained automated workflows and reporting systems, creating documentation standards and establishing single source of truth for operational processes
- Led cross-functional projects by defining scope, driving stakeholder alignment, and maintaining ruthless prioritization across competing business priorities
- Ensured customer experience systems were intuitive and reliable with user-first lens, preventing \$10K-\$30K+ business losses per case through proactive operations management
- Leveraged AI-powered tools and data analysis to identify process bottlenecks and implement scalable solutions for customer-facing operations

HomeAdvisor / ANGI — Golden, CO / Remote

March 2018 – September 2021

Tier 4 Supervisor, Business Engagement & Retention

- Promoted from frontline to operations specialist within 12 months, managing complex customer experience workflows for high-value client relationships
- Administered customer-facing systems and built automated processes for customer onboarding, reducing manual touchpoints and improving user experience
- Managed multiple stakeholder projects, balancing tradeoffs between customer needs and operational efficiency while staying focused on measurable impact
- Documented and standardized customer experience processes, creating scalable frameworks that improved team collaboration and response consistency

- Successfully transitioned operations to remote systems during COVID-19, maintaining customer satisfaction through streamlined digital workflows

KEY ACHIEVEMENTS

- 95% process efficiency improvement through systematic workflow optimization and cross-functional team coordination
- Prevented \$10K-\$30K+ business losses per incident through proactive technical troubleshooting and customer experience operations
- Successfully managed 1,500+ complex customer cases requiring systems administration and cross-departmental collaboration
- Developed standardized documentation frameworks improving operational consistency and team scalability
- Built automated reporting systems that enhanced stakeholder visibility and data-driven decision making

TECHNICAL PROFICIENCIES

CRM & GTM Platforms: Salesforce Service Cloud, Zendesk, Jira Service Management, HubSpot Service Hub, Workflow Automation Tools

Data & Analytics: Google Sheets, SQL (Basic), Executive Reporting, Dashboard Creation, Performance Tracking

AI & Automation: Generative AI Tools, Process Automation, AI-Powered Analytics, Machine Learning Applications
